Aggregate Amount of Shared Savings/Losses

Data not yet available from CMS

How Shared Savings Are Distributed

Summit Health-Virtua, Inc. will utilize shared savings payments to further its purpose, to reinvest in the ACO, to expand the ACO program, to improve quality metric tracking and performance, and to achieve a community benefit. In addition to reinvestment, the ACO may also distribute shared savings to ACO participants.

Summit Health-Virtua, Inc. will strategically reinvest shared savings realized through the Medicare Shared Savings Program (MSSP) to achieve the following:

1. Better care for individuals
   - Patient/caregiver experience
   - Care coordination/patient safety
     - Readmission rates
     - Admissions for ambulatory sensitive conditions
     - Adoption of electronic medical/health records
     - Medication reconciliation
     - Evidence-based guidelines
     - Screening for safety risks
2. Better health for populations
   - Preventive health
   - At-risk population management for at least diabetes, hypertension, ischemic vascular disease, heart failure, coronary artery disease
3. Improvement in other metrics such as utilization, length of stay in post-acute care settings, and costs.

In addition to reinvestment, shared savings may also be distributed to ACO participants to help achieve the ACO's stated purpose. Summit Health-Virtua, Inc. believes that the distribution of shared savings to providers is an important tool in realizing its overall objectives. Distributions to providers will incent and recognize behaviors and accomplishments that further the ACO's mission. Priority will be given to the contributions of primary care physicians as primary care physicians have a central role in the ACO's model.

As stated in the "Population Health and Care Coordination Committee" Charter, the PHCCC will recommend the rules for distribution of shared savings based on quality and cost metrics. Distributions to individual providers will be based upon their relative contribution. Summit Health-Virtua, Inc. will utilize the ACO's clinical and financial information to support valid and transparent evaluation of individual provider's performance.

The Board of Trustees will have the final authority concerning the use and distribution of all shared savings achieved by the ACO.
