

# IT'S A REMARKABLE STORY OF SURVIVAL.

BECAUSE HE CHOSE VIRTUA MARLTON,  
HE'S STILL IN THE PICTURE.

## Emergency Angioplasty Patient Mike Guerra.

One night, after a particularly stressful day, Mike felt a sudden tightness in his chest. His wife, a registered nurse, quickly recognized the symptoms of a potential heart attack. She immediately got him to Virtua Marlton — a decision that saved his life. Within minutes upon arrival, the Virtua team performed emergency angioplasty.

Because emergency angioplasty is not available at every hospital, where Mike went for treatment made all the difference. Virtua Marlton is fully equipped with the most advanced cardiac catheterization laboratories, and experienced interventional cardiologists ready to treat heart attacks within minutes of a patient's arrival.
