

TB Test Consent for Minor Volunteers

Virtua West Jersey Hospital tests all paid and unpaid health care workers on an annual basis for Tuberculosis (TB). This is done to protect our patients and health care workers from exposure to TB. The Tuberculin Purified Protein Derivative (PPD) test is administered at Virtua, free of charge to all volunteers. The PPD test must be evaluated by a nurse between 48 and 72 hours after the injection.

If you have any questions, please contact VIRTUA at WORK – 856-325-5310.

I authorize Virtua West Jersey Hospital to administer a PPD test to my child.
