

LifeCare

Living better with chronic conditions

LifeCare

Chronic illness can limit your quality of life. LifeCare can help restore it. While your physician treats your illness, LifeCare concentrates on relieving your symptoms. These services complement – rather than replace – your medical treatment plan. LifeCare physicians, nurses, social workers and dietitians are highly accessible, providing:

- Pain management
- Relief from symptoms such as incontinence, depression, anxiety and stress, fatigue, shortness of breath, loss of appetite, mobility and balance
- Medication management
- Nurse navigation and care coordination that connects patients to the right services and schedules them at the right time
- Nutritional counseling to help regain appetite and make easy, healthy choices
- Emotional and spiritual support
- Guidance with complex treatment choices

Who can benefit from LifeCare?

LifeCare helps patients and families coping with a wide range of illnesses including:

- Cancer
- Lung disease such as chronic obstructive pulmonary disease (COPD)
- Cardiac disease such as congestive heart failure
- Complications from diabetes
- Neurological conditions such as Parkinson's disease and multiple sclerosis

Feeling better may lead to a more positive outlook and increased strength. Call to learn more about the many benefits of LifeCare and how to access services.
